ASSIGNMENT of INVENTION

WHEREAS, the INVENTOR listed below, (hereinafter Assignor) residing in the State of Maryland, is one of the owners of the following Application for United States Letters Patent, and the invention(s) set forth therein, as shown by the records of the United States Patent and Trademark Office:

U.S. PAT. APPL. NO.	FILING DATE	TITLE
10/691,975	Oct. 24, 2003	HIGH-FLOW VOID-MAINTAINING MEMBRANE LAMINATES, GRIDS AND METHODS

WHEREAS ASSIGNEE, ADVANCED GEOTECH SYSTEMS, of 4820 Pulaski Highway, Baltimore, MD 21224, a Maryland Corporation (hereinafter "Assignee"), is desirous of acquiring the full right, title and interest in and to said invention for the United States of America, and in and to said United States Patent;

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged by Assignee, Assignor has sold, assigned, transferred and set over, and by these presence hereby sell, assign, transfer and set over to Assignee the entire and exclusive right, title and interest in and to said invention for the entire world, and for the United States of America, and in and to said application for Letters Patent listed above, including any and all divisional, continuation, continuation-in-part, reissues or extensions thereof, and to any corresponding International (PCT) applications, to be held and enjoyed by Assignee for its own use as fully and entirely as the same would have been held and enjoyed by Assignor had this assignment not been made; the Commissioner of Patents and Trademarks of the United States of America is hereby authorized to transfer the portion of the title indicated to said application to said Assignee in accordance herewith; this assignment being under covenant, not only that full power to make the same is had by the Assignor, but also that such assigned rights are not encumbered by any grant, license, or other right theretofore given; Assignor hereby undertakes to execute and deliver to Assignee upon request all lawful documents which may be reasonably requested by Assignee, and to furnish Assignee with all facts relating to said invention as may be requested.

The undersigned hereby grants to Assignee's Attorney the power to insert in this Assignment any further identification which may be necessary or desirable to comply with the rules of the U.S. Patent and Trademark Office for recordation of this Assignment.

ASSIGNMENT

THIS ASSIGNMENT ("Assignment") is made this 19 day of December, 2005, by Tenax Corporation, a Maryland corporation, Peter J. Ianniello and Aigen Zhao (collectively, the "Assignors") in favor of Advanced Geotech Systems LLC, a Maryland limited liability company (the "Assignee").

WHEREAS, the Assignors have invented or may have been assigned or otherwise have certain rights and interests in one or more United States patents, applications for United States patents, invention disclosures or drafts thereof; and

WHEREAS, the Assignee, together with any successors, legal representatives or assigns thereof, desires to acquire the entire right, title and interest in and to said United States patents, applications for United States patents, invention disclosures or drafts thereof.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Assignors irrevocably hereby assign to the Assignee their entire right, title and interest for the United States of America (as defined in 35 U.S.C. § 100), and throughout the world, in:

United States Patent Application No. 10/691,975 ("High-flow void-maintaining membrane laminates, grids and methods"), filed September 1, 2004,

(hereinafter referred to as the "Invention") and in any and all patents and patent applications which result from or claim priority to the Invention, including, but not limited to, any and all reissues, extensions, renewals, reexaminations, divisionals, continuations and continuations-in-part of such patent application and patents issued therefrom, and any and all foreign counterparts thereof, to the full end of the term or terms for which such patents issue, such entire right, title and interest to be held and enjoyed by the Assignee the same as they would have been held and enjoyed by the Assignors had this Assignment not been executed.

The Assignors agree to promptly execute all papers necessary in connection with the Invention including, but not limited to, any and all continuations, continuations-in-part, divisionals, reissues, extensions, renewals, reexaminations or corresponding applications thereof, including any and all foreign counterparts thereof, and patents issued therefrom, and also to promptly execute separate assignments in connection with such applications, at no additional cost or consideration, as the Assignee may reasonably request or deem necessary, to the extent permitted by or in accordance with any applicable laws.

The Assignors agree to promptly execute all papers necessary in connection with any interference which may be declared concerning the Invention or any continuations,

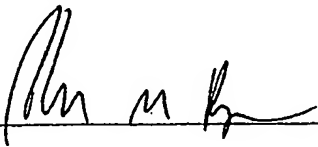

continuations-in-part, divisionals, reissues, extensions, renewals, reexaminations or corresponding applications thereof, including any and all foreign counterparts thereof, and patents issued therefrom, and to provide reasonable cooperation to the Assignee in obtaining evidence and going forward with such interference, at the cost and expense, if any, of the Assignee.

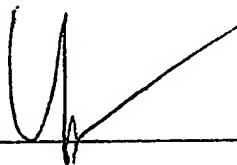

The Assignors agree to communicate to the Assignee all technology and information known to the Assignors respecting the Invention, and, at the cost and expense of the Assignee, to testify in any legal proceeding, sign all lawful papers, make all rightful oaths and generally do all things reasonably necessary and proper (to the extent permitted by or in accordance with any applicable laws) to aid the Assignee in obtaining and enforcing proper patent protection for the Invention in all countries throughout the world.
